

UP TO 24 MONTHS' CREDIT

PROTECT, with the backing of the Danish Government, are pleased to offer up to 24 months' credit for national account projects.

Our longer term credit agreement is based on 4 bills of exchange over a period of 24 months. The first payment becomes due six months after delivery of the fog cannon units. Hereafter three half-year instalments (Of the remaining amount).*

SECURED IN SECONDS

Once an order is placed, the following procedure must be followed:

- 1 PROTECT Denmark must receive all financial details about the end-user
- the same information banks normally require when evaluating a company's credit - e.g. the last two years' accounts
- 2 Assisted by a Danish bank and supported by the Danish Government the financial status is evaluated within 8 working days.
At the same time the end-user is charged a 275.- € registration fee
- 3 The Danish Government will then give a "YES" or a "NO" to the financing of this specific customer and project, depending on the amount of money involved - for example 250.000,- € - they give us the cost / premium of this insurance
- 4 The premium at the moment is between 0,5 % and 4 %, plus the normal bank interest rate
(approx. 5% at the moment in Denmark)
- 5 PROTECT Denmark then invoice the end-user directly - in EURO's (the program only operates in EURO's)
- 6 The end-user must then pay 15 % prepayment of the total order within 8 days.
Handling fees charged by the bank of the end-user are not included in the financing solution
- 7 We prepare all the paper work and the end-user must sign all the relevant documents - e.g. 4 bills of exchange with the credit of 6, 12, 18 and 24 months payments
- 8 PROTECT can then give the end-user up to 24 months' credit of the remaining 85 %.
Note: The invoiced end-user must be the legal owner of the equipment for the full 24 months

QUICKER AND BETTER SECURED

This longer term credit agreement is designed to help end-users to install the fog cannon units they require to quickly complete their national chain of properties.

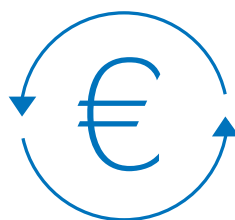

Complete or major coverage with PROTECT Fog Cannon has been proven to produce inevitable savings from significantly reduced burglaries. This has resulted in savings for the cost of repairs, the down time caused by not being able to trade, plus the reduction which arises from the large cost of suffering burglary losses.

Installation of PROTECT Fog Cannon across an estate will pay for itself, in many cases between 1 and 2 years.

The Danish Government is backing this programme to promote Danish exports and to secure Danish jobs.

This is an initiative where everyone involved will benefit.

To qualify, the end-user must place an order, which can include parts of the installation, and must retain possession of the fog cannon units for the full period included in the 24-month credit agreement.
