

Reverse Fog Discharge: Shoot backwards

With a DIY kit it is possible to turn the fog output 180 degrees. This makes concealed installations and maintenance problem free. Of course, the extension piece also fits this solution.

Different positions - different nozzles

Scan the code with a smartphone to see how the four different nozzles work.

Contact technical hotline

We are stand by at the telingphones, ready to help you mount and optimising a fog cannon. Call us and ask for technical hotline.

Innovative security fog

The developers at PROTECT always work hard to make fog cannons and accessories better and smarter - beneficial to alarm installers and users. Many of PROTECT's products are made in close collaboration with alarm installation contractors.

DESIGN AND FEATURES

- Diseñado para instalaciones ocultas
- Para instalaciones discretas a través de una pared (horizontal) o techo (vertical) *
- Permite aumentar la distancia entre el cañón de niebla y la boquilla

***ADVERTENCIA:** Las temperaturas bajas pueden hacer que gotee el extensor de boquilla, tanto en instalaciones horizontales como en verticales.
