Warning:

When deleting a fog cannon, customer or location, all pertaining information will also be deleted. It is not possible to restore it.

1. Before installation of the IPCard

If needed, upgrade the firmware in the fog cannon to v3.00 or higher.

Write down the PCB serial number (NOT the fog cannon serial number).

Use the IPCard manual to install and setup the IPCard. If necessary, upgrade the firmware in the IPCard to v1.07.

To access the IntelliCloud, no changes on the IPCard are needed.

We recommend changing the access code on the IPCard.

2. Access to IntelliCloud

Request access by sending an e-mail to the PROTECT Distributor/Partner in your country.

An account with your name, company and password will be created.

When you receive the user name and password, you can log in to cloud.protectglobal.com.

We recommend changing the password.

3. Login to IntelliCloud

Open <https://cloud.protectglobal.com> in a web browser.

Select your language and log in.

The first time you login, you are asked to review the terms and conditions.

4. Dashboard

The dashboard shows 6 icons.

Any red dot on an icon indicates that a fog cannon requires your attention.

Click on the icon(s) with the red dot(s) to learn more.

The number tells you the number of affected fog cannons in this category.

It is not necessarily an error.

CONNECTION

“CONNECTION” tells you if there has been no connection from the fog cannon to the IntelliCloud for more than two hours.

Possible reason: Upgrade of switches and routers on locations.

Info: The fog cannon is probably still active and ready to discharge.

FLUID

“FLUID” shows fog cannons with low fluid levels equivalent to the same information in IntelliSuite and the LED display on the fog cannon (fault code E2).

Info: The fog cannon has one shot left.

BATTERY

“BATTERY” shows fog cannons with battery fault codes E4, E5 and/or E6.

Info: The fog cannon is active and ready to discharge.

FOG LAST 24H

“FOG LAST 24H” indicates fog cannons that have to be discharged within the past 24 hours equivalent to the same information in IntelliSuite and on the LED display on the fog cannon (fault code E2).

Info: The fog cannon has one shot left.

POWER

“POWER” shows fog cannons that fail due to lost mains power.

The fog cannon can discharge within its backup period (refer to its datasheet for more information).

Restore local power supply urgently.

TECH ERROR

“TECH ERROR” means technical error. The fog cannon is unable to discharge and requires your attention urgently.

5. Map view

Each pin on the map represents a fog cannon registered in IntelliCloud.

Click on a pin to learn more.

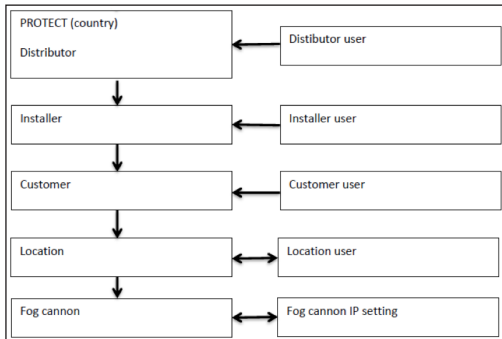

Please note that the pins do not change colour.

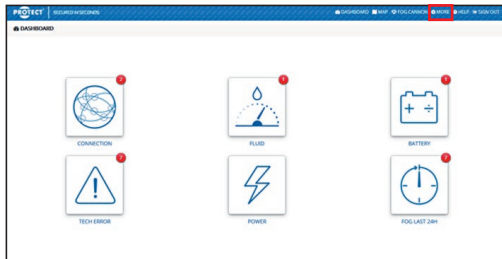

In areas with multiple fog cannons, the pin will show the total number.

6. Add new customer

The hierarchy of IntelliCloud:

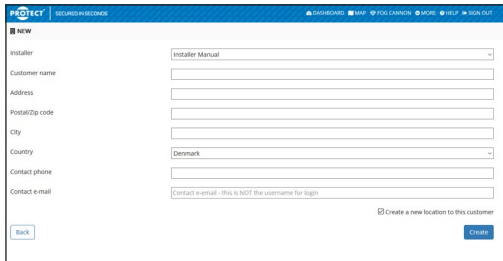

Select “MORE” in the menu.

Select “MANAGE CUSTOMERS”.

Click on the green button “NEW”.

A screenshot of the 'NEW' customer creation form in the PROTECT application. The form fields include: Installer (dropdown menu with 'Installer Manual' selected), Customer name, Address, Postal/Zip code, City, Country (dropdown menu with 'Denmark' selected), Contact phone, and Contact e-mail (with a note: 'Contact e-mail - this is NOT the username for login'). A checkbox labeled 'Create a new location to this customer' is checked. At the bottom left is a 'Back' button and at the bottom right is a 'Create' button.

Fill in the required information.

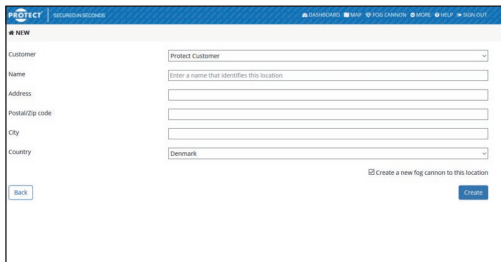

If you wish to add more customers, then uncheck the checkbox just above the “CREATE” button. Otherwise you will be directed to the “Add new location” page.

7. Add new location

Select “MORE” in the menu.

Select “MANAGE LOCATIONS”.

Click on the green button “NEW”.

The screenshot shows a web interface for adding a new location. At the top, there is a blue navigation bar with the logo 'PROTECT' and the text 'SECURED BY SECONDS'. To the right of the logo are several menu items: 'DASHBOARD', 'MAP', 'FOG CANNON', 'MORE', 'HELP', and 'SIGN OUT'. Below the navigation bar, the page title is 'NEW'. The form contains the following fields:

- Customer:** A dropdown menu with 'Protect Customer' selected.
- Name:** A text input field with the placeholder text 'Enter a name that identifies this location'.
- Address:** A text input field.
- Postal/Zip code:** A text input field.
- City:** A text input field.
- Country:** A dropdown menu with 'Denmark' selected.

At the bottom right of the form, there is a checkbox labeled 'Create a new fog cannon to this location'. At the bottom left, there is a 'Back' button, and at the bottom right, there is a blue 'Create' button.

Fill in required information.

Important! Take care to enter precise address information, as this is used in the map view.

If you wish to add more locations, then uncheck the checkbox just above the “CREATE” button. Otherwise you will be directed to the “Add new fog cannon” page.

8. Add new fog cannon

Select “FOG CANNON” in the menu.

Click the green button “NEW”.

The screenshot shows the 'NEW' form in the PROTECT system. The form is titled 'NEW' and has a 'SECURED IN SECONDS' status. The top navigation bar includes 'DASHBOARD', 'MAP', 'FOG CANNON', 'MORE', 'HELP', and 'SIGN OUT'. The form fields are as follows:

- Distributor:** PROTECT Denmark Distributer (dropdown menu, highlighted in red)
- Installer:** PROTECT Denmark Installer (dropdown menu, highlighted in red)
- Customer:** Protect Customer (dropdown menu, highlighted in red)
- Location:** Aalborg (dropdown menu, highlighted in red)
- PCB serial no.:** Enter serial number for the fog cannon PCB (text input field, highlighted in green)
- IPCard serial no.:** Enter serial number for the IPCard (text input field, highlighted in green)
- Name:** Enter a name that identifies this fog cannon (text input field, highlighted in blue)

Buttons: 'Back' (left) and 'Create' (right).

RED:

Use the drop-down menus (Distributor - Installer - Customer - Location) to select the location of the fog cannon.

GREEN:

Type in the PCB and IPCard serial numbers (NOT the fog cannon serial number).

BLUE:

Name the fog cannon with the exact location, e.g. Meeting room 1 or Warehouse C2.

If the fog cannon has not yet been connected to the internet or if the serial number is incorrect, you will see this message:

Attention

- We are not able to verify the serials AS the device has not yet been online. Please verify serials and check "ignore serial match" below to add device.

Verify that the serial numbers have been entered correctly, and check “Ignore serial match” to proceed.

Ignore serial match

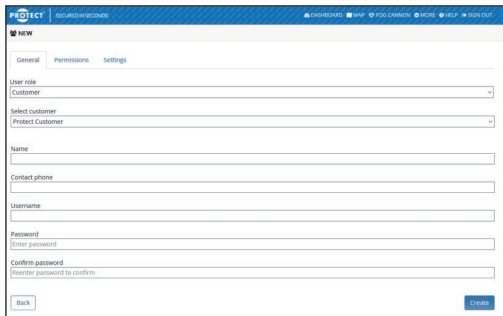

Create

9. Add new users

Select “MORE” in the menu.

Select “MANAGE USERS”.

Click the green button “NEW”.

The screenshot shows a web interface for adding a new user. At the top, there is a blue header with the 'PROTECT' logo and navigation links: DASHBOARD, MAP, FOG CANNON, MORE, HELP, and SIGN OUT. Below the header is a 'NEW' button. The form is divided into three tabs: 'General', 'Permissions', and 'Settings'. The 'General' tab is active. The form fields are: 'User role' (a dropdown menu with 'Customer' selected), 'Select customer' (a dropdown menu with 'Protect Customer' selected), 'Name' (a text input field), 'Contact phone' (a text input field), 'Username' (a text input field), 'Password' (a text input field with placeholder text 'Enter password'), and 'Confirm password' (a text input field with placeholder text 'Reenter password to confirm'). At the bottom left is a 'Back' button, and at the bottom right is a blue 'Create' button.

In the drop-down menu select the user role and customer relation.

In the “USERNAME” field, enter the user’s e-mail address.

Previous 1 Next

You can sort the fog cannons by clicking on NAME, LOCATION or PCB SERIAL NUMBER.

Search: Start typing to automatically search all your IntelliCloud enabled fog cannons.

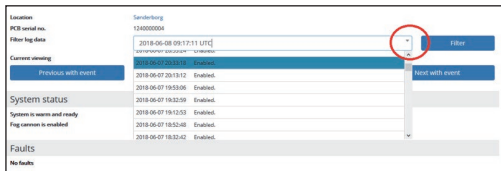

Details: Click on the blue “DETAILS” buttons to get the latest status of the fog cannons.

Important! The status is NOT live - the information can be up to 20 minutes old.

Backup battery system	
Battery detected	
Battery health condition	Very Good
Battery voltage	25.31V
General information	
Heater temperature	32°C
PCB temperature	47°C
Lifetime	4 years 20 days 19 hours 37 minutes
12V AUX supply voltage	13.24V
Total fog releases	423
Dipswitch settings	1 2 3 4 5 6 7 8 9
Inputs	

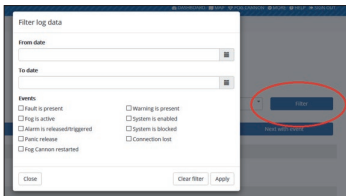

Events: Click on the drop-down menu.

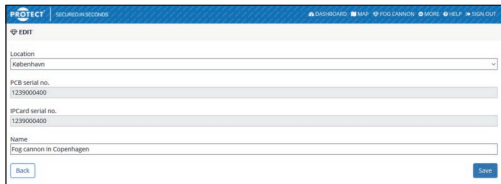

The screenshot shows a control interface for a fog cannon. On the left, there are sections for 'Location' (Sanderborg), 'PCB serial no.' (124000004), 'Filter log data' (with a search input), 'Current viewing' (Previous with event), 'System status' (System is warm and ready, Fog cannon is enabled), and 'Faults' (No faults). The main area displays a table of events with columns for date, time, and status. A red circle highlights a drop-down arrow on the right side of the event list. A 'Filter' button is located to the right of the event list.

Date	Time	Status
2018-06-08	09:17:11 UTC	Warning is present
2018-06-07	20:33:18	Enabled.
2018-06-07	20:13:12	Enabled.
2018-06-07	19:53:06	Enabled.
2018-06-07	19:32:59	Enabled.
2018-06-07	19:12:53	Enabled.
2018-06-07	18:52:48	Enabled.
2018-06-07	18:32:42	Enabled.

To narrow your search, you can apply a filter.

The screenshot shows a 'Filter log data' dialog box. It contains fields for 'From date' and 'To date'. Under the 'Events' section, there are several checkboxes: 'Fault is present', 'Warning is present', 'Fog is active', 'System is enabled', 'Alarm is released/triggered', 'System is blocked', 'Panic release', 'Connection lost', and 'Fog Cannon restarted'. A red circle highlights a 'Filter' button on the right side of the dialog. At the bottom, there are 'Close', 'Clear filter', and 'Apply' buttons.

The screenshot shows the 'EDIT' form for a fog cannon. The form includes fields for 'Location' (København), 'PCB serial no.' (1239000400), 'IPCard serial no.' (1239000400), and 'Name' (Fog cannon in Copenhagen). There are 'Back' and 'Save' buttons at the bottom.

Edit: You can edit the location of a fog cannon. You can see the PCB and IPCard serial numbers, and you can change the name of a fog cannon.
